

The secret is out!

New! Secret AGEnt™

Undercover Makeup is here!

Fresh ... flawless ... for every skin type ... and a perfect match every time!

Secret AGEnt Undercover Makeup is a full-coverage, liquid foundation that helps hide imperfections, giving skin a smooth, flawless look. Ideal for all skin types!

The new number and lettering system will make matching simple too. The shades are divided into three skin tones: neutral, pink and yellow to better address every client's needs, and each features a number identifying the intensity of the shade. The higher the shade number, the more intense the shade. You'll always be the same skin tone, so when your skin tone lightens or darkens, you'll simply select a lighter or darker shade within the same skin tone family.

Shade conversion chart

16 new shades, one to match every woman's natural undertones!
